

# BORONIZING TECHNOLOGY

## APPLICATION

- High velocity and abrasive fluid production wells
- Wells with severe erosion/corrosion challenges
- Deviated wells with repetitive tubing wear
- Downhole tools, pup joints, blast joints, valves, seals and other critical components

## KEY FEATURES

- High hardness and wear-resistant surface layer
- Excellent resistance to abrasive wear and corrosion including CO<sub>2</sub> and H<sub>2</sub>S environments
- Suitable for high temperature applications up to approximately 600°C
- Applicable on internal and/or external tubing surfaces
- No change to tubing weight, ID or OD
