

CABIN MAINTENANCE SERVICES

Neural Oilfield Service Sdn. Bhd. (NOSSB) provides comprehensive cabin maintenance services for client-owned cabin facilities, supporting the upkeep, safety, functionality, and overall condition of cabin assets.

Our maintenance scope covers a range of electrical, inspection, testing, housekeeping, cosmetic and repair activities, allowing routine and corrective maintenance requirements to be managed under one service scope.

Cabin Maintenance Services

- Electrical Maintenance – HVAC

We provide maintenance support for cabin Heating, Ventilation and Air Conditioning (HVAC) systems to ensure proper operation, suitable cabin conditions and reliable equipment performance.

Scope includes:

HVAC system inspection

Operational checks

Identification of electrical or equipment-related issues

Routine maintenance and corrective support

Bala : 012 522 2484/nurbaizura@neudimension.com.my

Electrical Maintenance – Startup & Check

Scope includes:

- Electrical system startup
- Functional and operational checks
- Identification of abnormalities
- Basic troubleshooting and maintenance support

Body Inspection

Scope includes:

- External and internal visual inspection
- Identification of physical damage
- Inspection of cabin body condition
- Identification of areas requiring corrective action

Housekeeping & Cosmetics

Scope includes:

- Cabin cleaning and housekeeping
- General cosmetic upkeep
- Minor appearance-related maintenance
- Identification of items requiring further repair

More Information please contact :

Load Test & MPI Test

NOSSB can coordinate and perform applicable load testing and Magnetic Particle Inspection (MPI) activities as part of cabin maintenance and inspection requirements.

These activities help verify the condition and serviceability of relevant components and lifting-related equipment, subject to the applicable testing requirements.

Sling Test

Scope includes:

- Sling condition inspection
- Applicable load testing
- Identification of damaged or deteriorated slings
- Testing documentation/certification, where applicable

Damage Repair

Scope may include:

- Assessment of damaged areas
- Minor repair works
- Corrective maintenance
- Replacement or rectification of damaged components, where applicable
